

Company Concept

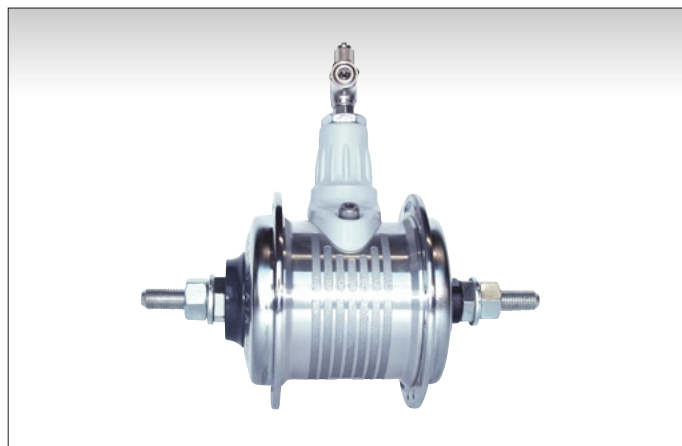

Manufacture of good products based on creative ingenuity, enthusiasm and harmony among people.

Company History

This corporation was founded in Osaka in 1948. It manufactured and sold bicycle hubs while outsourcing some production. Nakano Iron Works Co., Ltd. was established in 1954 for the integrated production of bicycle hubs. It qualified as a JIS-certified plant in 1962 and manufactures products using fully automatic equipment. In 2003 it started production of AIR HUB, the world's first air replacement device to come into practical use.
